

### CHURCH AND AUXILIARY DEPARTMENT

**BAPTIST.**  
Sunday school at 10 o'clock. The union service of worship will be held in the First M. E. Church at 11 o'clock. Rev. A. C. Horsman will deliver the message. His subject is "The Sin of Unjust Criticism."

**CHRISTIAN SCIENCE.**  
"Mind" is the subject of the lesson-  
sermon in First Church of Christ, Scientist, on Sunday, August 23d, at 10:45 a. m., at 183 South First street. The golden text is from Isaiah, 26:3: "Thou wilt keep him in perfect peace, whose mind is stayed with thee: because he trusteth in thee."  
Among the citations which comprise the lesson-  
sermon is the following from the Bible: "O, the depth of the riches both of the wisdom and the knowledge of God! How unsearchable are His judgments and His ways past finding out." (Romans 11:33).  
The lesson-  
sermon also includes the following from the textbook of Christian Science: "Science is the health with Key to the Scriptures," by Mary Baker Eddy: "Infinite Mind is the creator, and creation is the infinite image or idea emanating from this Mind. If Mind is within and without all things, then all is Mind; and this definition is scientific." (pp. 256, 267).  
Sunday school at 11:50.

IN MEMORIAM—TOWNSEND.  
The Washington Post of Aug. 8th, has the following in regard to the death of Clinton Paul Townsend, a native of this city, who died at his home at Tideway, Kennilworth, Great Neck, L. I., on August 3d:  
"Mr. Townsend had been widely known for his work in electro-chemistry and as a patent lawyer. He was born in Fulton, N. Y., on July 31st, 1868, and during his boyhood his family moved to Washington. He studied chemistry and for some years was associated with the sugar industry in Louisiana, later completing his education at the Torcoran Scientific school in Columbia, now George Washington university, where he was graduated in 1896.  
"From 1896 to 1902, Mr. Townsend served in the United States Patent office as an assistant examiner of the electro-chemistry department. After his resignation from the patent office, he did independent research in electro-chemistry and one of the results of this work was the invention of the Townsend cell.  
"While in the patent office Mr. Townsend had been associated with Dr. Eugene A. Byrnes, then primary examiner in the electro-chemistry department. In 1903 he and Dr. Byrnes joined in the practice of patent law at Washington, forming the firm of Byrnes & Townsend.  
"Mr. Townsend was a founding member of the American Electro-Chemical society, becoming a vice-president. He was a director of the Research Corporation, and during the war was on the executive board of the National Research Council.  
"When the United States entered the World war, Mr. Townsend was appointed to the army Ordnance Department as a consulting chemist. His principal service was in the nitrate division, where he was concerned chiefly with processes of nitrogen fixation for the production of explosives.  
"Besides his affiliations with scientific societies, both in this country and abroad, Mr. Townsend was a member of the Cosmos and Chevy Chase clubs of Washington; the University and Chemists' clubs in New York and the North Hempstead Country club in Long Island.  
"In 1900 Mr. Townsend married Miss Claire Blake of Washington, who died in 1916. They had one son, Clinton Blake Townsend, New York patent attorney, who survives, with Mr. Townsend's second wife, the former Kathryn S. Moses of Washington, whom he married in 1919, and a son, Robert.
